

Enzymatics-- SPK0001-P96

产品名称	Enzymatics-- SPK0001-P96
公司名称	广州胜创生物科技有限公司
价格	面议
规格参数	品牌:Enzymatics 型号:SPK0001-P96
公司地址	广州市天河区长兴路291号901房（该场所仅限办公用途）
联系电话	4006-400-850 13570444143

产品详情

Enzymatics --SPARK™ DNA 文库构建试剂盒用于Illumina™ 平台--SPK0001-P96

SPARK™ DNA 文库构建试剂盒用于Illumina™ 平台

摘要：DNA库的温度稳定循环室的样品制备 Ion Torrent™平台

产品描述：

Preparation of library DNA is an important process for successful cluster formation on Illumina® platforms which is required to generate valuable sequencing data. This kit provides room temperature stable reagents to convert double stranded fragmented DNA into libraries. The SPARK™ DNA Sample Prep Kit is primarily designed for constructing genomic DNA libraries, paired-end DNA libraries, or paired-end multiplexed DNA libraries. All enzymes and buffers required are provided as room temperature stable mixes that can convert 10 ng to 1 μg of fragmented dsDNA into library DNA.

产品组成：

产品组分：

Supplied with:

End Repair Mix (LY0001V-1): A DNA polymerase produces blunt ended dsDNA fragments

and a DNA kinase phosphorylates their 5' ends.

A-Tailing Mix (LY0002V-1): A DNA polymerase adds a single deoxyadenosine monophosphate residue to the 3' end of blunt ended dsDNA fragments.

Ligation Mix (LY0003V-1): A DNA Ligase installs barcoded dsDNA adapters with a deoxythymidine monophosphate overhang to

dsDNA fragments with 3' dAMP overhangs..

产品信息：

Part Number : SPK0001-P96

Concentration : N/A

Unit Size : 96 Reactions
