

ACS Certification

产品名称	ACS Certification
公司名称	厦门博测商务服务有限公司
价格	36000.00/张
规格参数	品牌:BOT 型号:ACS WRAS:NSF
公司地址	厦门市同安区舒安里17号
联系电话	0592-5522220 05925522220

产品详情

acs certification

acs is the french health certification bodies, full name is (academia constiintei de sine), mainly based on afnor (association francaise de normalisation) published standards (such as xp p41-251) for plumbing products testing. currently in paris and lille, with associated laboratories.

afnor on metal glass and ceramics products and materials, developed a corresponding safety and health standards. in which toxicity tests of materials and products used to detect whether the analysis placed in the water from heavy metals, softener, and stabilizer substances, organic matter tests used to detect the impact properties of the materials, including product contact with drinking water, water taste, odor and color and other indicators; material properties testing of materials mechanical properties.

composition of the files of request for acs

required for the contents of the acs

the files should mention at least the following information:

the documents submitted at least the following details:

address and phone number of the applicant

the applicant's address and telephone number

a or trade description of the representative accessory and the accessories family

the main components of trade in parts and series of briefings

with ACS (French plumbing equipment, environmental certification), the main components of the description calls for special details

its nomenclature including glues the nature of the auxiliaries of operation (oil, grease etc)

its name, including the sticky, and agents, auxiliary materials (oil, grease) and other features.

the inside volume of the accessory being in contact with water

parts in contact with water volume area

the wet total surface of the accessory

the total wet surface components

the wet organic surface of the accessory

structural components of the wet surface

the wet surface of each organic component

each of the structural components of the wet surface

the nature of auxiliaries of operation (grease oil etc)

auxiliary materials (oil, grease properties)

the diagram of water circulation intended for human consumption

intended for human consumption of the water cycle diagram

the technical form with the representative drawing accessory with show the different parts on contact with water

structural components of the supplier name, address and contact

write technical representative parts of the chart form, indicating that the different parts in contact with water

each part contains a description of series of technical specifications, especially in the size range and a range of processes

series of components named, for human consumption design, contact with water for each part of the detailed description of

metals and minerals part of the standard design and business names

structural components of the formula for describing and commercial life-ming

the following are the main acs test content:

acs certification - french standards (afnor xp p41-250 , 1-3 section), composition analysis; click "profile" requirement; storage testing (microbiological analysis)) component tests; component group testing; physical and chemical material testing; poison science and microbiology testing (according to different applications); extraction test; water testing.
