

## 850nm多模电压型可调光衰减器

产品名称	850nm多模电压型可调光衰减器
公司名称	四川领航光瑞科技有限公司
价格	1800.00/只
规格参数	品牌:Linkhome 型号:0101
公司地址	-
联系电话	暂无

## 产品详情

### 850/1300多模可调光衰减器

850nm PDL is a VOA product family using the MEMS chip with a movable mirror on the silicon. The design is based on the principle of micro-mirror tilt angle. It has low power consumption, low PDL, high speed, and low polarization dependence. It is suitable for applications such as optical communication, optical interconnect, and optical testing. The device is designed to be electrically controlled and has a fast response time. The polarization dependence (PDL) is less than 0.2 dB.
