

日本进口原装電動液壓泵

产品名称	日本进口原装電動液壓泵
公司名称	上海浩驹机械设备有限公司
价格	13500.00/个
规格参数	品牌:IZUMI 原理:离心泵 用途:增压泵
公司地址	嘉定工业区叶城路1630号10幢1462室
联系电话	86-02133520297 18019280437

产品详情

產品型號：r14-f1

產品名稱：電動液壓泵。

產品特性：超級經典可靠機型有線遙控，可在任何位置控制出油停止回油等動作保壓式液壓回路,可進行吋動控制用以調整工件角度兩段式進油可使活塞快速前進具壓力開關到達設定壓力自動切斷電源並保持壓力,特別這用於電力行業壓接作業需要保壓15-20秒的要求鋁合金液壓油箱可防止生鏽以及增加液壓油冷卻散熱效果有線遙控，控制電壓12v保壓型液壓泵特別這合電力系統壓接作業japanese classic paragraph with the oem model, performance perfectly matchedwired remote control, can be in any position to control the oil back to the oil stop actionpressure keeping hydraulic circuit, can be used to adjust the workpiece inch pneumatic control anglethe two section type into the oil can make the piston move quicklywith pressure switch to reach the set pressure automatically cut off the power supply and keep up the pressure, especially suitable for electric power industries crimping operation need pressure maintaining 15-20 seconds requirementsaluminum alloy hydraulic tank can prevent rusting and increase the hydraulic oil cooling effectwired remote control, control voltage 12vholding pressure hydraulic pump is particularly suitable for power system crimping operation

規格：儲油量：2l 額定輸出壓力：700bar 電壓：ac220v功率：340w低壓吐油量：2.6l/min
高壓吐油量：0.32l/min

附件：高強度紙箱 標配2米高壓油管

重量：15kg尺寸 374mm產地：taiwan 臺灣備註：最經典機型，年銷售量過萬臺，返修率極低360°可靈活旋轉的油管接頭獨特的回油控制線圈,這用於大行程的液壓工具例如彎管機,可避免線圈因為長時間動作燒毀可視液壓油窗可切換的排氣閥,可防止搬運時液壓油泄漏金屬保護罩可在護外作業業內唯壹保固2年，耗材與人為操作不當除外the most classic models, annual sales of over 10000, the repair rate is very low360 degree rotating flexible tubing jointsoil control coil to a unique, suitable for the large stroke hydraulic tools

such as pipe bending machine, which can avoid the coil because of long time action burnedvisual hydraulic oil windowthe exhaust valve can be switched when handling, can prevent the leakage of the hydraulic oilthe metal shield in the outdoor workthe only thing warranty 2 years, consumables and improper operation except

本产品的品牌是IZUMI，原理是离心泵，用途是增压泵，驱动方式是电动，叶轮数目是多级，材质是铸铁，泵轴位置是边立式，流量是2.6L，重量是15KG，型号是R14-F1
