

抗氧剂1010 抗氧剂1010

产品名称	抗氧剂1010 抗氧剂1010
公司名称	天津市光大神禹化工商贸有限公司
价格	37000.00/吨
规格参数	型号:抗氧剂1010 品牌:蓟县 有效物质含量:99 (%)
公司地址	天津市蓟县开发区中昌路东
联系电话	86-02229125488

产品详情

型号	抗氧剂1010	品牌	蓟县
有效物质含量	99 (%)	主要用途	橡塑
CAS	6683-19-8		

抗氧剂 jx-1010 antioxidant jx-1010

一、名称：抗氧剂1010 name:antioxdat jx-1010 化学名称：四[(3.5-二叔丁基-4-羟基苯基)丙酸]季戊四醇酯 english name:四[3.5-tertiary butyl-4-hydroxyl pheny)pent

aerythriol 化学分子式：c₃₇h₁₀₈o₁₂ chemistry structural formal 分子量：1177.65 molecule number:1177.65 二、性质：抗氧剂jx-1010是以2.6-二叔丁基苯酚为起始的一系列大分子量抗氧剂当中最重要的一个品种。本产品和大数目的聚合物相溶性好，具有高效无毒不变色、无污染、无臭味等优异性能，适合于高温应用。characteristic:antioxygen jx-1010 is one of the most important large molecule amount antioxygen which is begun and ended by tertiary butyl phenol phosphite.this product is soluble in many polymers and has the excellent characteristic of efficiency,poisonlessness, discolor, impolution, no foul smell. it can be used in high temperature.三、用途：purpose:本产品主要用于聚乙烯、聚酰胺、聚酯、聚氯乙烯、abs树脂一级各种合成橡胶和石油产品中，对聚丙烯有卓效。本品与辅助抗氧剂jx-dltp并用时，具有协同效应，用途极为广泛。this product mainly used in polyethylene, polyamide, polyester, polyvinyl chloride, abs resin and all kinds of synthetic rubber and petroleum products, is highly effective to polypropylene. when used with complementary antioxygen jx-dltp, it has cooperative effect and has extensive uses.四、指标与规格 index and specification 外观：白色结晶粉末 appearance:white crystal powder 挥发份：0.5% volatile: 灰份：0.1% ash amount 熔点：110-125 melting point 透光率：(10g/100ml 甲苯) 425nm 95% 500nm 97% photic rate:(10g/100ml toluene) 425nm 95% 500nm

97%含量：98.0% content 五、贮存与包装：store, transportation and package 本品性质稳定，无特殊的贮存要求，贮存时避免高温及潮湿。纸板桶内衬塑料袋包装，净重25kg/桶。because of its steady character, it does not have special store claim, when stored it should avoid high temperature and moisture, the package is the paperboard barrel lined with plastic bag. the net weight is 25kg/barrel.
