

around.the effect will be better with the use of the pumping steam carpet cleaning machine.

application:

Mix 1 part of the a little foam with 10-20 parts of water (general dirt 30 parts of water), pour into solution tank, with the using of the pumping washing machine. we suggest that add a small amount of defoamer in the waste water tank of the washing machine to protect the pumping washing machine, which can improve the efficiency.
