

Milenia Hybridtech 1

| | |
|------|--------------------------------|
| 产品名称 | Milenia Hybridtech 1 |
| 公司名称 | 畅宇云商（北京）科技有限公司 |
| 价格 | 5800.00/1 |
| 规格参数 | 品牌:TwistDX 型号:MILENIA01 |
| 公司地址 | 北京市门头沟区石龙经济开发区永安路20号3号楼A-7427室 |
| 联系电话 | 13810792952 13810792952 |

产品详情

Milenia Genline Hybridetect 1 lateral flow strips can be used to detect amplification products generated when using the TwistAmp nfo kit in combination with a TwistAmp nfo probe and labelled amplification primer. The Hybridetect 1 lateral flow strips allow for detection of a biotin labelled amplicon. Following amplification products can be diluted, applied to the dipstick sample pad and run in buffer for several minutes after which accumulation of gold particles on the test line indicates the presence of the specific amplicon. Although originally developed for PCR applications, this product gives superb results without a requirement for post-amplification clean-up or hybridization when used with the RPA system. Using lateral flow dipsticks permits detection in a convenient instrument-free format which may be an approach of choice in certain settings.
