Plain Sewing Model 100-2

Plain Sewing Model 100-2

Back by the famous Fischbein craftsmanship, the Empress? Model 100-2? Sewing Head features two needles that create a secure, sift resistant, two parallel stitch closures. The Model 100-2 is perfect for closing every type of open mouth bag, including multi-wall paper, woven and laminated woven polypropylene and jute in the most demanding work environments. Fischbein's pressurized, self-lubricating system protects moving parts and ensures maximum productivity with low maintenance. The Empress 100-2 sewing head's precision rotational parts allow for adjustable operating speed from 35 to 45 feet per minute, with very little vibration. The Model 100-2 creates two perfect, parallel stitch lines with a two thread, double locked stitch – adjustable from 2.25 to 3.25 per inch, factory set at 2.5 stitches. Fischbein's Model 100-2 two needle sewing head is featured on our cost effective, entry level Model 400 Pro2? and heavy duty 400NS2? Plain Sewing Systems. Selective options for the Model 100-2 include power infeeds, thread break detectors, oil sensors, bag coder and photoelectric controls for system integration. Food grade lubricant is also available. For maximum performance use Fischbein [industrial sewing thread](#) and genuine Fischbein parts. Specifications ? System Component ? Plain sewn closure ? 2 Needle format ? Thread pusher knife ? Standard 2.5 stitch/inch ? Type 401 2-thread stitch ? 35 to 45 feet per minute
