产品详情

TE同向平行双螺杆挤出机组-详细说明:

南京欧立挤出机械有限公司是国内生产同向双螺杆挤出设备的骨干企业,拥有一批多年专业从事高聚物配混挤出装备的研发、设计、制造和管理的技术团队。欧立遵循“不断探索,勇于创新,自我完善,服务社会”的企业宗旨,致力于配混挤出装备的质量和科技含量,以拓展其在高分子材料和其它基础材料的应用技术领域。公司产品主要销往广东、江苏、浙江、山东、上海、北京、东北、天津、福建等地,同时我们还出口到国外,如法国、荷兰、德国... TE系列平行同向双螺杆混炼挤出机,主机挤出部分采用积木组合式结构,广泛应用于通用塑料、工程塑料、热塑性橡胶等高分子材料的填充、增强、增韧等共混改性,以及特种纤维、特种胶粘剂等加工领域延伸。为了满足不同层面客户的需求,我们将双螺杆系列产品按螺杆转速及扭矩等级划分为TE&HTE两大系列。同时采用全新的、行业领先的现代化CNC高精度数控设备,对机型及零件参数全面优化升级,淘汰落后配置。主机采用积木式原理设计,结合产品工艺特性需求,螺杆长径比、机筒结构、换网、切粒形式、自控方式等均可灵活选配。借助于螺杆构型研发设计的丰富经验与软件技术,可按需设计螺杆构型实现物料输送塑化、混炼均化、剪切分散、排气脱挥、建压挤出等。优化的设计与CNC数控加工手段相结合,全面提升了产品精度,使主机关键零件的制造精度达到了全新水准,从而可更好的实现主机工艺过程的精密控制、高度的一致性和灵活的互换性,可实现螺杆元件三维曲面的更高精度,具有更优异的自洁性。实现了常规与高扭矩硬齿面传动箱制造精度和质量的跨越提升,整体可靠性与质量稳定性达国内领先水准;结合强大的设计经验,使得特殊新型的机筒结构及螺杆元件有了加工制造平台

TE Series Co-rotating Twin Screw Extruder are widely used in the compounding modification industry, like the filling, reinforcement, toughening of plastics, engineer plastics and thermoplastics, and also for the special fibers and adhesive process.,

Main products are classified as TE & HTE series, according to the max screw rpm and its torque rating. All models and parts have been upgraded with modernize CNC equipment. Our customers will have whole products range to

meet their unique requirements.

As the segment structure design, the equipment can be configured with different L/D, barrel designs, screen changer, pelletizing system, and/or electric control, to best meet unique requirements of different process. Cause our better understanding of the different material, the screw con fi guration is designed based on rich experience and software technology to accomplish the material conveying, plasticizing compounding, shear and dispersion and pressurization.

Screw elements, accurately designed with CNC technology, are fully intermeshed, providing self-cleaning and easy interchangeability.

Upgrade accuracy and quality of the normal and high torque gear box. The special new type barrel structure and screw elements been manufactured with our powerful design experience.
