产品详情

美国coldjet 干冰清洗机sdi60

说明

cold jet's sdi select™ 60 is designed to be the most simplistic, user-friendly dry ice cleaning system available today. with the ability to shave any dry ice media input through patented feeder technology, the sdi select 60 opens new cleaning opportunities for users who experience limited dry ice availability.

the sdi select 60 can use any aero blasting machine nozzle or accessory to suit your application's need, and can be as gentle or aggressive as necessary - with blasting pressures ranging from 20 to 250 psi - covering the widest range of applications in a single machine in the industry.

cold jet's patented feeder technology creates shaved dry ice on demand, regardless of input. simply switch to full pellet cleaning to penetrate the most difficult, thick contaminants.

特点

shave with any dry ice media (even scrap ice)

bypass for full 3mm pellet performance

clean from as low as 50 cfm to save on compressed air and reduce noise levels

increase pressure up to 250 psi to clean the most stubborn contaminants

choose from any aero nozzle or accessory to maximize flexibility

pn 2a0236 includes internal pressure regulator
