产品详情

Shsan篮式过滤器采用金属滤篮作为过滤元件，常用精度50微米-8000微米，可清洗后重复使用，使用成本低，既可以过滤大颗粒杂质，也可以保护关键设备如泵、喷嘴、换热器、阀门等，显著延长其使用寿命，提高运行效益。篮式过滤器可安复合滤网型滤篮或冲孔型滤篮，坚固耐用，可靠性高。

Shsan basket filter is the necessary equipment on the pipeline, as the safe-guard filter, removes large contaminant particles and protect key equipments such as pumps, nozzles, heat exchangers and valves. It can obviously extend the service life of key equipments, improve operational efficiency and avoid the risk of costly system downtime. SF filter also works well as the direct large particle filter. The metal filter basket is reusable by cleaning and cost less filter media consumption. The Shsan filter baskets especially designed for Shsan filter are durable and highly reliable.

参数

可选滤篮：复合型滤篮，冲孔型滤篮

可选精度（um）：50-8000

单机滤篮数量：1-24

单机过滤面积（m²）：0.05-33

壳体材质：304,316L,CS

适用粘度（cp）：1-30000

设计压力 (MPa) : 0.6, 1.0

Specification

Optional filter basket: Compound filter basket, Punching filter basket

Filtration rating(um): 50-8000

Number of basket: 1-24

Filter Area(m2): 0.05-33

Housing Material: 304,326L,CS

Applicable Viscosity(cp): 1-30000

Design Pressure(MPa): 0.6, 1.0
