RE-系列旋转蒸发仪（0.5-2L）

RE-Series Rotary Evaporator (0.5-2L)

用途：

旋转蒸发器是化学工业、医药工业、高等院校和科研实验室等单位必要的基本仪器之一，是制造及分析实验中提取浓缩的主要设备。

特点：

RE-2000A电动机具有10-180rpm无级调速及自动升降功能，主体采用铝合金材质，平稳安全，美观大方。旋转体由一组稳定可靠的微型电机、测速电机和集成电路控制装置组成。在电子调速作用下，可在10-180rpm范围内稳定旋转，已达到国内外先进水平。

USE:

Rotary evaporator is one of the necessary basic instruments in chemical industry, medicine industry, institutions of higher learning and scientific research laboratory and other units, is the major equipment of extraction and concentration in manufacturing and analysis of experiments.

Features:

The motor of RE-2000 has 0-180RPM step-less speed regulation and automatic lifting function, the main body uses the aluminum alloy material, smooth, safe, and beautiful. Revolving body is consisted of a set of stable and reliable micro motors, speed motors and integrated circuit control devices. In the role of electronic speed, it can be rotated stably in 10-180RPM range, which has reached the advanced level at home and abroad.
