

武高所直供NAYDJ油浸式高压试验变压器

产品名称	武高所直供NAYDJ油浸式高压试验变压器
公司名称	南澳电气（武汉）有限公司
价格	10.00/套
规格参数	品牌:南澳电气(武汉)有限公司 型号:NAYDJ 特点:电压余度大，电晕声小，局放小
公司地址	武汉市东湖高新技术开发区光谷大道60号光谷科技产业园8栋
联系电话	027-87677658 15327206266

产品详情

产品简介

naydj系列油浸式/充气式/干式试验变压器（以下简称试变）又称升压器，它是发电站、供配电系统及科研单位等广大用户的基本试验设备。用于对各种电器产品、电气设备、绝缘材料等按规定电压下的绝缘强度试验，考核产品的绝缘水平，发现被试品的绝缘缺陷，衡量承受过电压的能力。

产品特性

naydj系列 油浸式试验变压器

- 1、naydj系列油浸式试验变压器选材优良，质量可靠，年稳定性好。
- 2、电压余度大，电晕声小，局放小。
- 3、采用新式绝缘材料，体积小，重量轻。

naydj series oil type/ gas type/ dry type testing transformer

product introduction

naydj series oil immersed/ inflatable / dry type testing transformer (short for test transformers), also known as booster, it ' s the power station, power supply and distribution systems, and research institutes, and other users basic testing equipment. used for a variety of electrical products, electrical equipment, insulation materials, etc. which under the specified voltage dielectric strength test, the insulation level of assessment products found to be defective insulation test

to measure the ability of withstand over-voltage.

also called name

high voltage withstand testing equipment; high voltage testing transformer; ac dc high voltage test device; ac/dc hipot test set; cascade type high voltage testing transformer; oil-immersed testing transformer; oil type test transformer; gas type test transformer, sf6 gas-typed test transformer, sf6 gas-insulated testing transformer; dry type test transformer

the characteristics of series oil type testing transformer

1. oil type test transformer selected reliable quality and good stability materials.
2. the voltage margin is high, corona sound is small, partial discharge is small.
3. adopting modern insulating materials, small in size, light in weight
