产品详情

YB系列油压陶瓷柱塞泵为液压驱动单双缸作用陶瓷柱塞泥浆泵。该泵具有运行平稳、噪音低、压力高、压力波动小、体积小、重量轻。安装维修操作方便、使用寿命长等特点。主要用于各类型压滤机供浆，亦可用于长距离输送泥浆、清（污）水、煤浆（或其他悬浮液）。

YB series hydraulic ceramic piston pump is worked by ceramic plunger, which is hydraulic driven on Single and double cylinder. The pump has a smooth operation, low noise, high pressure, pressure fluctuations, small size, light weight. Installation and maintenance easy operation, long life and other characteristics. Mainly used for various types of pressure Filter for slurry, can also be used long-distance transmission for slurry, clean (sewage) water, coal slurry (or other suspension).
