产品详情

Main Parameter:	
Pixel Configuration	1R1G1B
Best viewing distance	>10m
Best viewing angle	120-140 °
Maximum power consumption	<800W/m ²
Driving method	1/2 scan
Brightness	>6500cd/m ²
Control method	Synchronized
Gray scale	13 bits
Colors	16777216

Color temperature	6500k
Driving device	Constant current
Working voltage	AC220V/110V \pm 10%
Working temperature	-40 ~+60
MTBF	>10,000 hours
Frame frequency	60Hz
Refresh frequency	1000Hz
IP grade	Front IP65 Rear IP54
Life Span	100,000 hours
Brightness adjustment	manual,256 level
Effectivce Communication Distance(without relay)	Unshielded twisted pair net line transmission distance :100M, max trn distance:130M ; Multi-mode optic fiber :500M; Single-mode optic fiber :10KM
Systems operating platform	WINDOWS(WINXP,WIN7,WIN8,WIN10),with a friendly UI,and condary development

Component:

1.The Chips of LED: 3 in 1 SMD3535 lamp from Kinglight

2. IC Driver:SM16016SC

3.Power supplys: G-energy ,with UL certification

4.PCB board: Fire resistant with FR4 standard and UL.

5. Controlling system: NOVA

Other clause:

Terms: (1) Quotation valid time: one month (2) The price is based on Exwork price (3) Packing details: Wooden Case.
(4) Controller = NOVA Data sending card+ Data Receiving card (5) Cabinet is made by Steel ,waterproof (6) It is used for
(7) Payment method: T/T 30% deposit before production , T/T 70% balance before delivery (8) Lead time : 30 working days

(9) Technical Support: We could send our engineer to guide the installation for you. But the relevant cost should be paid by your esteemed company such as visa, hotel, food, plane ticket for forth, and should help to arrange our staff visa. (10) Guarantee time: 2 years quality guarantee, and we will provide free part placement, if there is any problem which belongs to us during this period.
