

力创无压力输送系统高效稳定可定制

产品名称	力创无压力输送系统高效稳定可定制
公司名称	郑州力创自动化设备有限公司
价格	800.00/米
规格参数	品牌:力创 型号:LC-BPMP 3000:36000
公司地址	河南省郑州市郑上路五龙工贸园
联系电话	037169001068 135924812951831756519013663859378

产品详情

输送线主要是完成饮料不同工序之间的输送任务，生产线运行效率的高低，与输送线的配置有很大的关系。在输送线的配置上必须考虑到后段设备短暂停机（例如：更换标签等）时，对前段设备的运行不能产生影响，同时应该能将前后段的设备良好的衔接在一起，才能使整条生产线达到较高的运行效率。用于食品，饮料等产线输送，分配和后段包装的连线输送

产品分类：• 全自动流水线 • 无压力输送系统 • 全自动风送系统

- 机械结构为全新设计，采冲压和折弯，刚性好，重量轻，互换性好，传动运行可靠，维修方便
- 减少生产线的故障停机时间，提高整线生产效率
- 多排变单排自动差速变频控制系统
- 全程PLC控制速度加减和缓冲

Conveyors is mainly to complete its beverage conveying task between different processes, production line of high and low operation efficiency, and the transmission line configuration has a lot to do. On conveyor line configuration must consider the period of equipment after a brief stop (for example: change the label, etc.), the influence on the front-end equipment could not operate, at the same time should be able to will be good to connect together before and after the period of equipment, to make the whole production line to achieve high efficiency. Used in food, beverage production line, such as transportation, distribution and after period of packaging of the attachment

Product categories: • automatic assembly line, pressure conveying system, automatic air conveying system

Mechanical structure for the new design, stamping and bending, good rigidity, light weight, good interchangeability, reliable operation and easy maintenance reduce the downtime of production, improve the efficiency of the whole production line

automatic change single differential frequency conversion control system Add and subtract and buffer, the entire PLC control speed
