

九成新ZVB4网络分析仪

产品名称	九成新ZVB4网络分析仪
公司名称	深圳市迈凯瑞科技有限公司
价格	.00/台
规格参数	品牌:安捷伦 型号:ZVB4
公司地址	深圳市龙华新区龙华街道东环一路天汇大厦D栋6楼D-615室
联系电话	0755-83598906-806 15712119384

地址 : 深圳市龙华新区东环一路天汇大厦D栋6楼D-615室

=====

The R&S®ZVB series of vector network analyzers covers the frequency ranges from 300 kHz to 4/8 GHz and from 10 MHz to 14/20 GHz. It has been designed for universal measurements on passive and active components. The R&S®ZVB series greatly simplifies vector network analysis especially for multiport measurements and measurements on balanced devices. Featuring comprehensive measurement functions, excellent specifications, high measurement and data transfer speeds and remote-control capability, the analyzers of the R&S®ZVB series are an ideal choice for both development and production applications. The compact versions of the 14 GHz and 20 GHz two-port models

leave ample room for test setups in the lab, featuring a height of only 24 cm and a depth of 42 cm.

回收ZVB4 , 二手ZVB4网络分析仪回收ZVB4 , 二手ZVB4网络分析仪 New multiport concept

Instruments with two or four test ports – for multiport and balanced measurements Two internal sources (four-port models) – to provide RF and LO signals for mixer measurements by means of a single unit Capability to perform balanced measurements – to characterize balanced DUTs by their mixed mode S-parameters

Optional automatic calibration units – to speed up calibration and avoid operator errors
