we are a knife factory in yangjiang--chinese knife capital.

we have been in pattern welding steel line since 2007, specializing in classic configuration, particularly the folding, fixed blade and composite blade structures for collection and daily use.

we had served as a knife modeler for many knife factories in yangjiang for three years since 2007, that job brought us a chance to make many famous brand knives and communicate with the knife companies and buyers from the usa, europe and japan.

keyman commodity co., ltd. was established in 2007 year and gained a great reputation in the knife marketplace for our quality, design and function. we will be fast to make a knife sample for your approval if you place your knife order to us with your design paper and logo. even we just have three years experience in hardware trade but we have benefited a great deal when we are working on the knife pattern and mold tooling. now we are growing up fast to be a skilled knife maker with rich experience in knife-making.

we do not advocate to send any knife samples at a venture if you just inquire roughly. we think that it will help us to protect the rights and interests of our honored customers because most of our knives are made-to-order. we are proud to be a knife patternmaker at the outset and then become a knife maker in the process of time. that occupational history now is turning to be our vantage in knife making. our goal is to produce the best custom and production knives for your order. if you will buy knives from our keyman commodity co., ltd., you will be surprised that it is amazingly simple and easy, just like buying from your local distributors. we will have good production and fast shipping for your company.

thank you for your support and look forward to serving you soon.
