

Yamaha Clavinova Digital Piano(CLP-330)

产品名称	Yamaha Clavinova Digital Piano(CLP-330)
公司名称	北京御曲琴行有限责任公司
价格	9500.00/台
规格参数	包装:原装 材质:原装 品种:电钢琴
公司地址	北京市西城区虎坊路17号-2
联系电话	51253577 15321069828

产品详情

包装	原装	材质	原装
品种	电钢琴	规格	原装
型号	CLP-330	颜色	深玫瑰木色
featuresnew! pure cf sampling for superb tonality			

yamaha technicians selected a yamaha cfiiiis full concert grand with the best sound quality and finely tuned it under the best conditions. then, they used our uniquepure cf sampling* technique to sample all of its sounds in order to create the new clp300 series piano sound. as a result, you enjoy the same natural tonal variety as a yamaha acoustic concert grand piano. * clp380, clp370, clp340, clp330, clp320, clps308, clps306.

from pianissimo to fortissimo

the voice of an acoustic grand piano changes according to how it is played. yamaha"s sounds are sampled according to keystroke strength for each key at 10 levels or more. theadvanced wave memory(awm)dynamic stereo samplingtechnology analyzes these samples. then, it selects three to five levels* that best match your subtle touch on the keyboard. this enables you to directly transmit the delicate movements of your fingertips into expressive sound. * clp380 uses five levels.

all the subtle capabilities of a grand piano

key-off samples provide the delicate sound keys make when they are released. stereo sustain samples recreate the resonances of strings and soundboard when the damper pedal is pressed. string resonance samples provided the rich tones produced when one hammered string causes related strings to ring out in harmony. using these comprehensive gradations, clp300 series models can realistically reproduce the complex sounds of a grand piano. * key-off and stereo sustain: clp380, clp370, clp340. string resonance: clp380.

new! yamaha's unique tri-amp system

this proprietary tri-amp system improves sound quality by using three separate amplifiers for the high, middle and low frequency ranges. yamaha audio professionals, with their expertise of yamaha acoustic equipment in studios and halls, extensively explored the optimal balance of the 3-system amplifier to reproduce the natural tones of the piano. the result is greater amp efficiency, lower distortion and better frequency response across the entire sound spectrum. it also maximizes the benefits of pure cf sampling.
