

全国山东地区长期供应电光源钼丝

产品名称	全国山东地区长期供应电光源钼丝
公司名称	山东博坤新材料装备有限公司
价格	.00/个
规格参数	
公司地址	山东省淄博市临淄区晏婴路35号
联系电话	0533-7316600 13335231256

产品详情

电光源用钼丝Molybdenum wire for electric light source

山东博坤新材料装备有限公司
于经理
13335231256

用途：电光源专用钼丝主要用于制造各种电光源用绕丝芯线、支架、引出线、加热丝等。

Application

The special molybdenum wire for electric light source is mainly used to manufacture wire winding core, bracket, lead out wire and heating wire for various electric light sources

性能特征：采用自行研制开发的具有国际领先水平的连轧专利技术，生产各种牌号的高性能钼丝。粗钼丝无需焊接根重可达25kg，产品质量达国际先进水平。可根据客户的不同用途，对牌号、规格、加工状态等不同的要求，选定不同的加工工艺，使产品性能达到最佳效果。

Performance characteristics:

A variety of high performance molybdenum wires have been produced by using the patented technology of continuous rolling with international leading level. The coarse molybdenum wire needs no welding and the root weight can reach 25kg. The quality of the product reaches the international advanced level. According to the different uses of customers, the brand, specifications, processing status and other requirements, choose different processing technology, so that the product performance to achieve the best results.

化学成份:Chemical Composition

钼含量	其它元素含量总和	每个其他元素含量
Molybdenum Content	Other Elements Content Total	Each Other Element Content
MO 99.95%	0.05%	0.01%

规格及公差：Specifications and sewing requirement.

规格范围 直径	重量	200mm丝段重量偏差 (%)			直径偏差 (%)
		0级	级	级
