提到工业烤漆想必大家都不会太陌生,它虽然是适用于工业方面的,但是在生活中我们也有许多时候能够多多少少的了解到一些,它适合多种喷涂工艺的流水线生产,如无气喷涂、有气喷涂及静电喷涂等,可广泛用于烘 烤型五金机电,外用机械产品的涂复和表面保护及装饰,是传统溶剂型涂料特别是粉末涂料的环保安全替代产品。

It is not too strange for us to mention industrial lacquer. Although it is applicable to industry, we have many times in life that we can learn a lot more and less. It is suitable for many kinds of spraying process, such as gas spraying, gas spraying and electrostatic spraying, which can be widely used in baking type five. The coating and surface protection of gold electromechanical and external mechanical products are the environmentally safe substitute products of traditional solvent coatings, especially powder coatings.

推荐使用流水线施工、且进入烘房热固的场所,对硬度和光泽度要求较高的产品如:农机产品,五金机电、交通器材料、金属结构件及家用电器的涂覆。在基材上打三遍底漆、四遍面漆,每上一遍漆,都送入无尘恒温烤房,烘干。烤漆房结构:整个烤漆房为拼装式结构。房体采用子母插式保温喷塑墙板,密封、保温性能好,房体侧面装有工作门,方便工作人员进出;铝合金包边大门,门中央装有观察窗,可随时观察房内动态。选用低噪音高风量风机,确保喷漆效果的完

美性;优质不锈钢热交换器,换热效率高,使用寿命长。

It is recommended to use pipeline construction, and enter the baking room hot - solid places, for the hardness and glossiness of high demand products such as: agricultural machinery products, hardware and electrical machinery, transportation materials, metal structural parts and household electrical appliances coating. Three primers and four topcoat lacquers on the substrate are painted to the dust-free barn and dried. The structure of the baking room: the whole baking room is assembled. The room body adopts the thermal insulation sprayed wall panels with the inserting type, which has good sealing and thermal insulation performance. The working door is installed on the side of the house to facilitate the workers to go in and out. The aluminum alloy side door and the center of the door are equipped with observation windows, and the dynamic of the room can be observed at any time. Low noise and high volume fans are selected to ensure the perfection of the spray paint effect. The high quality stainless steel heat exchanger has high heat exchange efficiency and long service life.
