HP Workstation C3600

Pure processing power. The HP workstation c3600 draws its speed from the PA-8600 processor running at 552 MHz. Team the power of the PA-8600 with the c3600's capacity to support up to 8GB ram, 72GB internal disk, and six PCI cards, and you have a workstation that breaks through traditional bottle-necks of computation and desktop 3D design. Complimented by robust system architecture with fast memory and disk technologies, the HP workstation c3600 is masterfully crafted and optimized to maximize bandwidth, minimize system latency, and boost performance.
