肥料粒状重过磷酸钙 贵州鑫新

产品名称	肥料粒状重过磷酸钙 贵州鑫新
公司名称	贵州鑫新进出口有限公司
价格	.00/个
规格参数	生产企业:贵州鑫新 用途级别:肥料级 含量:46(%)
公司地址	贵州省贵阳市开阳县城关镇青山路16号
联系电话	0851-86831396 13984102033

粒状重过磷酸钙 (granular trisuper phosphate)

【产品名称】粒状重过磷酸钙(qtsp)

[product name] (gtsp)

【产品简介】粒状重过磷酸钙(gtsp)是一种高浓度、水溶性的速效磷肥,其有效磷含量是普钙(ssp)的2.5~3.0倍。该产品可作基肥、追肥、种肥和生产复混肥的原料;广泛适用于水稻、小麦、玉米、高梁、棉花、瓜果、蔬菜等各种粮食作物和经济作物;广泛适用于红壤、黄壤、棕壤、黄潮土、黑土、褐土、紫色土、白浆土等各种土质,尤其适合于我国华北、东北、西北等缺磷地区施用。

【 brief introduction 】 heavy granular superphosphate (gtsp) is a high concentration of water-soluble phosphate available, the available phosphorus content is ssp (ssp) of 2.5 ∼ 3.0 times. the product can be used for basal fertilizer, topdressing, types of fertilizer and fertilizer raw materials production; widely used in rice, wheat, corn, sorghum, cotton, fruits, vegetables and other food crops and cash crops; widely used in red, yellow, brown, huang chao soil, black, cinnamon, purple soil, soil and other albic soil, especially suited to china"s north, northeast, northwest and other areas of application of phosphorus deficiency.

【产品生产工艺流程描述】企业采用传统的化成法(den法)工艺进行生产。

磷矿粉(浆)与硫酸反应,进行液固分离,得到湿法稀磷酸。再经过浓缩得到浓磷酸。浓磷酸与磷矿粉

进行混合(化成)反应,反应物料经过堆置熟化、造粒、干燥、筛分、(必要时进行防结块包裹)、冷却得到产品。

【description of production process 】 enterprises using the traditional chemical method (den act) process for production.phosphate rock (plasma) and sulfuric acid reaction, the liquid-solid separation, dilute phosphoric acid to be wet. after concentrated phosphoric acid to be concentrated. concentrated phosphoric acid and phosphate rock mixed (chemical) reaction 堆置after curing materials, granulation, drying, sieving, (if necessary, anti-caking packages), have been cooling products.

【产品主要技术指标】【spec:】

总磷(tp2o5)含量 46.0%

有效磷(ap2o5) 含量43.0%

水溶磷(wp2o5)含量 37.0%

游离酸(以fp2o5计)含量 5.0%

游离水含量 (moisture) 4.0%

粒度(size)2~4mm 90.0%

颗粒平均抗压强度(intensity) 12.0n/粒。

产品外观及包装(packeging):每袋净含量50kg(±0.5kg)pp bag。

贵州鑫新有限公司创建于1997年3月,是一家国有大型化工企业"中化重庆涪陵化工有限责任公司"参 股的、集磷化工产品开发、深加工、销售、磷、硫、煤、金属多矿种开采勘探于一体的中型企业,是贵 州省化学工业协会副会长单位。 guizhou xinxin co., Itd was founded in march, 2007. it"s a medium-sized enterprise which is shared by a national large-scale chemical enterprise "sinochem chonggin peilin chemical industry limited liability company" and honoured to be the vice-chairman of the chemical industries association in guizhou province. it has integrated development, intensive processing, sale of phosphoric chemical products, drill and exploration multi-mineral phosphorus, sulphur, coal and metal.公司现拥有两座中型磷矿山,年生产能力可达10 0万吨以上、服务年限超过30年。同时,公司购进先进设备、整合技术力量,对已整合的磷、硫、煤等磷 化工发展所需要素的相关资源进行后续勘探和开发,目前已拥有能形成产业规模的多处矿权,为实现循 环经济磷化工产业链的延伸和可持续发展,打下了坚实的基础。our company has two medium-sized phosphate rock mine, which can produce more than one million tons a year and duration of service exceeds 30 years. meanwhile, our company purchased the advanced equipment and integrated technology strength to further exploration and development of relevant resources which the integrated phosphorus, sulfur, coal, etc phosphorus chemical need. at present, our company has owned multiple mineral rights which form industrial scales. we lay a solid foundation for realizing the extending and sustainable development of phosphorus chemical industry chain in recycling economy. 公司以科学发展观为指导,合理开发利用自然资源,坚持走循环经济的道路,坚持" 循环型精细磷化工多联产关联多元化"的发展思路,首先在2005年与全国最大经销商"徐州国华工贸有 限公司"、贵阳市供电局"天毅公司"合作,共同组建"贵州开阳国华天鑫磷业有限公司",合作开发 精细磷化工产品,该项目总投资3亿多元,实施完毕后将实现年销售收入7.6亿元,年利税额1.3亿元,200 5年底一期工程两台生产能力为7000吨/年的炉已建成投产。另外,按公司2007—2010年五年规划公司正着 手投资6亿元,依托公司完整的资源要素配置和中化涪陵在国内领先的湿法酸净化、节能工艺,构建公司 循环型磷化工多联产系统,2010年实现销售收入15亿元。
