体积式喂料机/Volumetric feeder

体积式喂料机配置水平搅拌改善物料推进部的流动性，使喂料更加准确。对流动性差，容易架桥的物料会配置垂直搅拌。与物料接触的部件均采用不锈钢件，螺杆安装拆卸方便，可广泛用于各种物料。

The volumetric feeder is equipped with horizontal agitation to improve the flowability of the material pushing part and to make the feedstock more accurate. Yes, poor liquidity. The material that is easy to bridge will be vertically stirred. The parts contacting with the material are made of stainless steel. the screw is easy to install and disassemble. It can be widely used in various materials.

双螺杆喂料机/Twin Screw feeder

体积式双螺杆喂料机适用于各种物料，包括流动性较差的粉末状，纤维状和片状物料。

The volumetric twin screw feeder is suitable for all kinds of materials, including powder, fibrous and sheet materials with poor flowability.

单螺杆喂料机/Single screw feeder

体积式单螺杆喂料机适用于各种粒料地，包括流动性较好的粉料和颗粒不均的回用料。

The volumetric single screw feeding machine is suitable for various granular materials, including powder materials with good flowability and uneven materials.
