

Paragon Pump 泵

产品名称	Paragon Pump 泵
公司名称	海泰美信贸易（北京）有限公司
价格	.00/个
规格参数	
公司地址	西四环南路19号
联系电话	0086-010-83265380 13810823489

产品详情

Paragon Pump 泵

PA Series - Our Single Stage, Back Pull-out, End-Suction Centrifugal Pump

PA Series Pump: a single stage, back pull-out, end-suction centrifugal pump
The PA Series Pump is a single stage, back pull-out, end-suction centrifugal pump. It is available in 41 sizes, from 2x1.25-5 (50x32-130) to 12x10-16 (300x250-400) for heads up to 690 feet and flows to 5300 GPM.

PS Series - Our Double Suction, Horizontal, Split Case Centrifugal Pump

PS Series - double suction, horizontal, split case centrifugal pump.
The PS Series is a double suction, horizontal, split case centrifugal pump available in 46 sizes from 5x3-8 (125x80-210) to 36x36-31 (900x900-780) for heads up to 656 feet (200 m) and flows up to 80,000 GPM (18,000 m³/hr.). The PS Series has a maximum operating pressure of 435 PSI (30 bar) and a maximum operating temperature of 221o F (105o C).

PV Series - Our Stainless Steel Vertical Multistage Pump for Clean Water or Liquids

PV Series: stainless steel vertical multistage pump The PV Series is a stainless steel vertical multistage pump available in eight sizes with up to 26 stages. These pumps are suitable for clean water or liquids. They are widely used for high buildings, plants, mining, city water supply systems and irrigation.

PM Series - Horizontal Multistage Stainless Steel Pumps for Clean Water or Liquids

PM Series Pump - horizontal multistage stainless steel pump The PM Series pumps are horizontal multistage stainless steel pumps available in four sizes up to 6 stages. These pumps, used for clean water or liquids of which chemical and physical characteristics are similar to those of water, are widely used for high buildings, general industrial, circulation water supply systems, etc.

CP Series - Commercial, Residential and Industrial Submersible Sewage Pump

CP Submersible Sewage Pump CP Submersible Sewage Pumps are designed for economical and reliable pumping of sewage water from commercial, residential and industrial sources. They are suitable for pumping clear and waste water containing solid and fibrous material.

SP Series - Our Submersible Sewage Pumps with Blockage-Free Vane

SP Series Submersible Sewage Pumps SP Submersible Sewage Pumps are mainly used to pump waste, sewage and mud with solids for municipal, industrial waste-treatment plants and dewatering at construction sites. They exhibit excellent performance due to an impeller with a single or double blockage-free vane, which avoids jamming and clogging. They are very convenient to install; a quick disconnect, portable version of this pump is available.

PEM Series - Our High Efficiency / Low Noise Electric Motor

PRM Series Electric Motor PEM Series motors are available in Squirrel Cage and Totally Enclosed Fan Cooled (TEFC) designs offering high efficiency and low noise. The motors are built to IP54 with Class F insulation but the junction box conforms to IP55. The three phase motors are available in fifteen (15) frame sizes with rated output from 0.25 HP (0.18 kW) to 425 HP (315 kW). Motors can be mounted horizontally or vertically.
