产品详情

600型双轴撕碎机

1.适用范围

1. Scope of application:

主要应用于废旧橡胶轮胎、废旧汽车、化工塑料桶、废旧家电、电路板、混合轻工业废料，轻建筑垃圾、医疗垃圾、集装箱托盘、废旧电线电缆、大型动物骨头的破碎。

It is mainly used in the crushing of waste rubber tires, scrapped cars, chemical plastic barrels, waste household appliances, circuit board, mixed light industrial waste, light construction waste, medical waste, container pallets, scrap wire and cables and large animal bones.

2.结构特点

2. Structural feature:

低转速、大扭矩、低噪音、处理量大并且出料颗粒均匀。

It has low revolution speed, large torque, low noise, large processing amount and even discharging particles.

撕碎机构经特殊设计，优化了对物料的抓取、撕裂与切割。

After the special design of shredding mechanism, the capture, tearing and cutting of materials are optimized.

电器控制：机器运行采用PLC智能控制，过载时自动反转调整物料的剪切角度，使操作更智能化简单化。

Control of electric device: PLC intelligent control is adopted in the machine operation, and the cutting angle of the material can be automatically reversed and adjusted during overload to make the operation more intelligent and simple.
