

凯斯格 12V/24V通用1000W大功率红色车载

产品名称	凯斯格 12V/24V通用1000W大功率红色车载
公司名称	广州东鑫电子科技有限公司
价格	110.00/个
规格参数	品牌:KESGE/凯斯格 型号:KTY1000-1224 产地:广州
公司地址	广州市增城新塘
联系电话	15016500789

产品详情

TYXH-1000W Modified wave修正波 Continuous power(持续功率):1000W Peak power(峰值功率) :2000W
Input voltage(输入电压) :DC 12V24V Output voltage(输出电压) :AC 100-120V/220V-240V
Frequency(频率) :60+/-3Hz,50+/-3Hz USB output(USB 输出) :DC 5V(0.5A,1A,2.1A) Output
waveform(输出波形) :Modified wave Size(产品尺寸) :166.7*95*55mm G.W.(重量) : **kg

Guangzhou Dixin Electronic Technology Co., Ltd. is located in Tianhe District, Guangzhou, which has developed economy and convenient transportation. Since its inception, the company has been committed to the development and production of high-efficiency crystalline silicon components, solar LED street lights, solar applications, solar energy storage batteries, and distributed photovoltaic solar power systems. The company has a professional technical team consisting of many people in the fields of solar photovoltaic, electric power, lighting, engineering, etc., and has established a set of standard system design, engineering implementation, after-sales service management norms, and is committed to becoming the best solar energy in China. Application Solution Service Provider. Adhering to the business philosophy of “ maximizing the value of customers' needs ” , the company adheres to the corporate culture of “ Quality is life and integrity is the cornerstone ” to comprehensively enhance the core competitiveness of the brand and provide users with excellent products while continuously providing Improve professional pre-sale, sale and after-sales service, and establish long-term and stable distribution cooperation relationship with many high-quality customers at home and abroad. While providing first-class photovoltaic power generation products and establishing a first-class brand, we pay more attention to customer interests and global environmental issues. We will make positive contributions to the use, development, progress and environmental protection of human clean energy with our own efforts and continuous innovation.
