

# pa66杜邦8018

产品名称	pa66杜邦8018
公司名称	东莞市业强塑胶原料有限公司
价格	53000.00/吨
规格参数	pa66杜邦:pa66美国杜邦 8018:8018
公司地址	东莞市樟木头塑金国际15栋
联系电话	0769-22103662 18025120985

## 产品详情

pa66美国杜邦8018 , pa66美国杜邦8018物性表 , pa66美国杜邦8018出厂证明 , pa66美国杜邦8018材质报告

pa66美国杜邦8018多少钱一吨 , 哪里有卖pa66美国杜邦8018 , pa66美国杜邦8018最新报价 , pa66美国杜邦8018最新价格

pa66美国杜邦8018代理商 , pa66美国杜邦8018 sgs认证 , pa66美国杜邦8018 ul认证等等

The features of connector PA66 plastic material

There are many common raw materials for connector insulation plastics, such as PA66, PBT, PA6T, PA9T, LCP, PPA and PPS. All kinds of plastic materials have their own characteristics.

Here is introduction of PA66 plastic material. PA66 we also called it nylon 66, white solid, density 1.14, melting point 253°C , PA66 is insoluble in general solvents, only soluble in m-cresol, etc., with high mechanical strength and hardness and great rigidity. PA66 is also commonly used for connectors to choose plastic materials.

PA66 plastic material features:

1. Excellent mechanical properties. Nylon has high mechanical strength and good toughness.
2. Self - moisturizing, good abrasion resistance. Nylon has good self - moistening, low friction coefficient, as a transmission part of its long service life.

3.Excellent heat resistance. Such as nylon 46 high crystalline nylon thermal deformation temperature is very high, can used for a long time under 150℃,after glass fiber reinforced PA66 thermal deformation temperature is above 250℃.

4.Excellent electrical insulation performance. Nylon volume resistance is very high, high breakdown voltage,so it is an excellent electrical insulation materials.

5.Excellent weather resistance.

6.Nylon is highly absorbent,saturated water can reach more than 3%. To a certain extent, the dimensional stability of the component could be affected.

The actual choice of the connector material depends on the specific application environment and requirements of the connector.Guangdong XKB connector manufacturer pay more attention to the selection of the connector materials,rigorous selection of materials is the basis for making the best products,after more than 20 years of industry polishing,XKB ensure electrical insulation, heat resistance, corrosion resistance, flame retardant and other excellent performance requirements of plastic raw materials.
