产品详情

DEION LC1463 series is a group of positive voltage output, low power consumption, low dropout voltage regulator. LC1463 can provide output value in the range of 1.0V~4.5V every 0.1V step. It also can be customized on command. LC1463 includes high accuracy voltage reference, error amplifier, current limit circuit and output driver module with discharge capability. LC1463 has excellent load and line transient response and good temperature characteristics, which can assure the stability of chip and power system. And it uses trimming technique to guarantee output voltage accuracy within $\pm 2\%$. LC1463 is available in SOT-23-3, SOT23-5, SC-70-5 and DFN1x1-4 packages which are lead free.
