FEATURES

High Output Power: P1dB = 39.5dBm (Typ.)

High Gain: G1dB = 10.0dB (Typ.)

High PAE: add = 36% (Typ.)

Low IM3 = -46dBc@Po = 28.5dBm

Broad Band: 4.4 ~ 5.0GHz

Impedance Matched Zin/Zout = 50

Hermetically Sealed Package

DESCRIPTION

The FLM4450-8F is a power GaAs FET that is internally matched for standard communication bands to provide optimum power and gain in a 50 ohm system. Eudyna 's stringent Quality Assurance Program assures the highest reliability and consistent performance.
