Previously, Youzhijian, Deputy Secretary of the District Committee, went deep into the surrounding areas of Guoxing Primary School, Qixi sewage outlet, Luowang East Road sewage treatment point, Lengshuipu intersection and other places to inspect the construction of sewage interception pipeline network in the area. Gaoya, the principal person in charge of Yueyang Project Department of Three Gorges Group, Yan Shilong, the deputy district head of the district government, and the person in charge of relevant district units and streets (townships) participated.

The construction of sewage interception pipeline network in central urban area is an important task assigned by the central environmental protection supervision. Recently, the main leaders of the Municipal Party Committee and the Municipal Government held several conferences and thematic studies to clearly incorporate the sewage outlets of Meixi, Guozhen and Luowang into the construction of sewage interception pipeline network in the central urban area.

On the investigation site, our district and the Yueyang Project Department of the Three Gorges Group have exchanged views on site selection of sewage interception pipeline network, source and flow direction of sewage, technical feasibility and construction environment protection, and carried out clear implementation at the leadership level, work level and technical level one by one. Youzhijian stressed that the relevant districts (townships) and departments should implement the decision-making and deployment of accelerating the construction of sewage interception pipeline network in the districts at the meeting of the Standing Committee of the District Committee chaired by Chen Gehui, Secretary of the District Committee, on July 5, and make clear that special posts should actively dock with the Yueyang Project Department of the Three Gorges Group to ensure the best construction environment and the fastest coordination. Service, and make every effort to promote the construction of regional sewage interception pipeline network on schedule.
