ELECTRICAL & ELECTRONICS

Electronics are being woven more and more deeply into the fabric of everyday life. The Internet of Things is building technology into our cities, homes, offices and automobiles, creating a new generation of smart devices. At the same time, the fierce pace of development and competition in electronics markets drives a constant demand for thinner, lighter, more energy-efficient devices. To meet these challenges, manufacturers need to make products that are cost-effective to produce, yet meet consumers ’ expectations for style, ease of use and sustainability. SABIC ’ s materials are the foundation for the next generation of electronic devices.
