

## 615 adhesive film

产品名称	615 adhesive film
公司名称	北京佳盛伟科技有限公司
价格	4600.00/卷
规格参数	品牌:JSW
公司地址	北京市朝阳区慈云寺1号院3号楼1层、2层(八里庄孵化器3-0351号)
联系电话	18510808500

## 产品详情

Application of jsw-615 adhesive film: structural bonding of TP lens, mobile phone, tablet computer, electronic screen, electronic components, mobile power supply and other hand-held digital products. 615 adhesive film bonding conditions: the bonding surface shall be clean when the width of the adhesive is greater than 1.0mm (including 1.0mm) and the thickness is greater than 0.3mm (including 0.3mm). The thickness of 615 adhesive film is 0.02mm-0.05mm, and it is applied at 110 ~ 120 (dispensing machine temperature). It is suggested that the specific data of cold pressing for 4s-6s should be determined according to the product material and structure, and the customer's technical personnel can determine it according to the product requirements 615 adhesive film material requirements: clean surface. The fit clearance is about 0.02mm-0.05mm.

The above is a brief introduction of 615 adhesive film. For detailed data, please go to the download window of jinshengwei official website. The following is the informal information of 615 adhesive film for reference only.

According to the mechanical properties of 615 adhesive film joints tested, the tensile, shear and compressive strength are relatively high. Therefore, considering the mechanical properties, when designing 615 adhesive film joints, the basic principle of joint form design and selection is: the stress direction is in the direction of the largest adhesive strength. It has the largest 615 adhesive film bonding area and improves the bearing capacity of the joint. The possibility of peeling, splitting and bending is reduced or avoided as much as possible. The glue layer is thin and continuous, uniform as far as possible, avoiding glue shortage. Due to the different bonding materials, 615 adhesive film dispensing process needs to be adjusted according to the actual situation to ensure the best bonding effect.

As the "leader" of the adhesive product industry, JSW Company started a comprehensive marketing campaign with the help of digital product platform very early. In all aspects of 615 adhesive film product design, marketing activities and services, JSW Company closely combined with touch screen business opportunities, launched a series of activities

and achieved good marketing effect of 615 adhesive film. Recently, news came from JSW: According to the survey data of digital product manufacturers in Dongguan, JSW615 adhesive film continued to occupy the top position in the domestic adhesive market with an overall market share of 17% from January to July this year. 615 adhesive film Products Continuously Grow, Dispensing Technology Is Popular in the Market and Becomes a Hot Sales Spot at Home and Abroad.

Environmentally friendly 615 adhesive film is emerging continuously. The adhesive has basically eliminated the use of benzene, and free formaldehyde volatiles harmful to the environment and human health are well controlled and limited. 615 adhesive film is widely used in mobile phone manufacturing industry due to its low price, fast curing speed, good mixing and bonding with plastic, glass and acrylic, and convenient use. Its cost and price cannot be compared with other adhesives. The obvious price advantage makes it imperative to develop 615 adhesive film with low pollution or no pollution. Due to its excellent performance, wide range of uses and low price, 615 adhesive film has been favored by many enterprises and is widely used in digital products industry, watch industry and audio-visual electronic panel bonding. At present, no other adhesive can completely replace 615 adhesive film.
