型号	201	材质	不锈钢

用于卡车、公共汽车等大型车辆的排气系统

for trucks, buses and other large vehicles exhaust system

安装于发动机排气歧管与净化器之间，可以吸收多方面的震动、降低噪音、补偿安装偏差与热胀冷缩

installed in the engine exhaust manifold and purifier, you can learn a wide range of vibration, noise abatement, compensation and the installation of bias rezhanglengsuo

采用互锁搭扣结构，伸缩性好，泄漏率低，能承受一定扭矩

hasp using interlocking structure, flexibility, low rate of leakage, can withstand a certain torque

伸缩管常用材料：sus304、sus321等

flexible tube commonly used material: sus304, sus321, etc.

耐高温、耐腐蚀

high temperature, corrosion-resistant

产品结构形式多样，长度不受限制，可满足不同车型的需要

diversified product mix, the length of the restriction, to meet the needs of different models

产品规格尺寸可根据顾客要求设计制造

product size specifications can be designed and manufactured according to customer requirements
