结构特点

King Kong Mesh Screen Window is the window installed on aluminum door and window that can prevent mosquitoes and other insects and be folded after high-strength stainless steel wire is manufactured by heavy precision machine and subject to powder an matte treatment

金刚网纱窗是采用经重型精密织机制成高强度不锈钢丝，而且表面经过喷塑亚光处理安装于铝材门窗上的具有防虫以及防撬功能的窗子

The Screen Window is provided with high-strength hardware locks inside. to ensure that the window can not be opened from outside. The window has shearing resistance. installation resistance and other excellent performance so as to realize the folding function.

纱窗窗内室内配备高强度五金具，锁上后无法从外面开启，具有抗剪、抗冲击等优性能，从而起到防撬效果

Dust and oil stain can be cleaned up conveniently and easily. The window will be as bright as a new window after treated using dust collector. water absorption sponge or common brush

灰尘及油污清洗方便容易，用吸尘器、吸水海绵或普通毛刷稍加护理即光亮如新

Aluminum Composite Wood Door and Window , uses wood and aluminum as the frame material outside and broken bridge thermal insulation structure inside. The glass used mostly uses hollow tempered glass. The aluminum material can not only be water-proof and moisture-proof , but also will not deform easily with its metallicity. which is suitable for water accumulation environment such as the balcony. kitchen and bathroom

铝木复合门窗，外不是采用木材加上铝材作为框料，内部采用断桥隔热结构，玻璃绝大多数采用中空钢化玻璃。铝材的金属性不仅能防水、防，推拉窗生产厂家，而且还不易变形，适用于包括阳台、厨房、浴室等可积水的环境。

Aluminum Composite wood Door and Window has another importance feature. Broken Bridge Hollow structure fully reflects the energy-saving environmentally friendly properties of the door and window. Such a structure enhances the sound insulation and air tight function of thermal preservation and thermal insulation , greatly reducing the energy consumption from heating and cooling

铝木复合门窗还有一个重要特点：“断桥+中空”结构是门窗的节能、环保性得到了充分体现。这种结构增强了隔音性和密封性，巴特孚推拉窗，能起到保温，隔热的作用，大大减少取暖和制冷的能量消耗。

现在随着生活质量的不断提高，溧水区推拉窗，人们对住宅质量与性能有了明确要求，建筑门窗的节能性能、安全性能、隔音降噪、防晒、舒适度、耐用度越来越多的受到重视，在购买建筑门窗产品时除了注重门窗明显部位如铝材、玻璃、配件等的质量外，相对更注重这些门窗部件组合后一个综合性能的实现。

真正的系统门窗，80系列塑钢推拉窗，是一个性能系统的完美有机组合，需要考虑水密性、气密性、抗风压、机械力学强度、隔热、隔音、防盗、遮阳、耐候性、操作手感等一系列重要的功能，还要考虑设备、型材、配件、玻璃、粘胶、密封件各环节性能的综合结果，缺一不可，最终形成高性能的系统门窗。
