那么在LED照明市场快速扩大的情形之下，我国本土产业又将有哪些动作？国家政策性推动公共照明市场广从LED产能技术配合可用性来看，我国提出了降低税率、加快设备折旧及其免费用地等优惠措施。

早在2012年7月3日，

国家科技部印发了《半导体照明科技发

展"十二五"专项规划》。[江苏春晨扁电缆YGCB312313](#)

根据规划设定的目标，到2015年，LED产业规模要达到5000亿元。而2012年，LED产业产值规模仅为1920亿元，与5000亿元仍有较大的差距，市场上升空间大。

So in the rapid expansion of LED lighting market, what actions will our local industry take? The national policy promotes the public lighting market. From the perspective of the availability of LED production capacity technology cooperation, China has proposed preferential measures such as reducing tax rate, accelerating equipment depreciation and free land use. As early as July 3, 2012, the Ministry of science and technology of the people's Republic of China printed and issued the "Twelfth Five Year Plan" for the development of semiconductor lighting technology. According to the goal set in the plan, by 2015, the LED industry scale will reach 500 billion yuan. In 2012, the scale of LED industry output value is only RMB 192 billion, which is still far behind RMB 500 billion, and there is a large space for market growth.
