产品详情

In 2019, China's automobile industry is affected by the multiple factors such as the downward trend of the economic situation, the decreasing of the new energy automobile subsidy and so on. The automobile industry is undergoing an inflection point that has never experienced before, and the whole industry is facing great downward pressure.

However, with the promotion of new-round scientific revolution and industrial transformation, the integration of motorization, intelligence, network connection and sharing used in vehicles empower the development of automobile industry. The energy power, production, operation and consumption mode of the automobile industry are beginning to be reshaped in an all-round way. The development trend of China's automobile industry has not been changed for a long time, and there is still great space and prospect for the development of China's automobile industry.

CIIF-NEAS 2020 held in Shanghai coincides with the time, through its unique and clear with valuable orientation, pragmatic and effective integration of government and market resources, has played a positive role in promoting the upgrading of the new energy automobile industry and the future development trend. Innovation has driven the economic development.

New Energy and Intelligent Network Vehicle

Intelligent Network Core Technology

Key Parts of Electric Vehicle

Charging Facilities and Related Products

Professional audience includes: vehicle manufacturing, auto parts manufacturing, power drive system, network technology with vehicle, new energy research on technology, charging infrastructure, energy management, national defense industry, rail transit, municipal construction, port transportation and other user industries and procurement departments.

There are series of forums, conferences and activities held in the same period, such as "International Forum on

Innovation and Emerging Industry", "World Intelligent Connected Vehicles Conference" and so on. Among of them, "New Energy and Intelligent Connected Vehicle Industry Development Summit", leading the development trend of automobile industry. "CIIF-i Blue Festival", which attracts more than 100 car models to participate in this activity.
