Functions of live shopping mall system:

### 1. Buy while looking

Build a live shopping mall system platform for small programs. Users can watch the live broadcast while shopping. The live broadcast also shows the recommended products of the anchor, real-time communication and interaction, and effectively improve the sales transformation.

### 2. Embedded with the original mall

The small program live shopping mall system is seamlessly connected with the original micro shopping mall, and the comprehensive live broadcast upgrade of the shopping mall is easily completed, bringing users a more vivid shopping experience.

### 3. Distribution function

Small program live mall system allows users to become a self-Media person through the platform, so that they can get their own number of fans and users, so as to obtain corresponding profits from the middle. For example, webcast hosts multiple rooms, and different agents invite users to enter the rooms they manage, and share according to the profit value (recommend products to fans during live broadcast interaction; when fans buy products, both agents and anchors can get commissions). )

### 4. Special effect beauty

The live shopping mall system of small programs has the functions of beauty and face slimming, which make the host

more valuable, software development, strengthen the visual experience of users watching the live shopping, and enhance users' purchase desire.

#### 5. Group sending of messages

Small program live mall system supports SMS Management and distribution in groups. For pushing commodity information, group sending, transformation and purchase are more efficient.
