2021???????????? The Tokyo International Hardware and Tools Fair is a professional exhibition focusing on tools. It attracts many buyers who are actively looking for new products to meet their customers' needs. In addition to importers and wholesalers, the audience also includes a wide range of retailers, such as household goods centers, who also source products directly from overseas companies. TOOL JAPAN is the best place to meet these awaiting buyers, meet Japanese hardware tools shops, hardware tool importers, family experience centers and discuss business. Exhibitors can conduct face-to-face sales with Japanese importers and retailers to find agents / distributors in Japan. Many Japanese manufacturers and even retailers will find new business partners through TOOL JAPAN to produce

their products. During the TOOL JAPAN exhibition, you will receive feedback on your products from wholesalers and professional users such as architects and landscape architects, so you can know which products are most suitable for the Japanese and Asian markets. While conducting business negotiations with buyers, you can also conduct market research to gain more opportunities to enter the market.
