

ABSPA-709超高冲击强度（台湾奇美）

产品名称	ABSPA-709超高冲击强度（台湾奇美）
公司名称	东莞市华韵塑胶原料有限公司
价格	15.00/kg
规格参数	品牌:原料 参数:物性 所在地:樟木头塑胶原料市场三期
公司地址	东莞市樟木头镇奥园塑金国际8栋214
联系电话	0769-87600377 13556776933

产品详情

ABSPA-709超高冲击强度（台湾奇美）

供应ABS台湾奇美POLYLAC全系列如下：

(1)一般级ABS台湾奇美PA-707、PA-757、PA-717C、PA-727、PA-726、PA-747、PA-709、PA-797

(2)高流动级ABS台湾奇美PA-756、PA-756S、PA-756H、PA-716、PA-746、PA-746H、PA-737

(3)押出级ABS台湾奇美PA-747R、PA-747F、PA-747S、PA-709S

(4)防火级ABS台湾奇美PA-763、PA-764、PA-764B、PA-765、PA-765A、PA-765B

(5)耐热级ABS台湾奇美PA-777B、PA-777D、PA-777E

耐热级ABS PA-777D台湾奇美PA-777D 耐高温PA-777D

(6)透明级ABS台湾奇美PA-758、PA-758R

1 The general performance of ABS is opaque ivory color granular material, its products can be colored, and has 90% of the high gloss ABS relative density of 1.05, low water absorption. ABS has good adhesion with other materials and is easy to print, coat and plating. ABS has an oxygen index of 18.2, a flammable polymer with a yellow flame, black smoke, scorched but not dripping, and a special cinnamon flavor. 2 Mechanical Properties ABS has excellent mechanical properties, its impact strength is very good, can be used at very low temperature; even if the ABS products can only be damaged by tensile damage rather than impact damage, this is the ABS high toughness realism. ABS has excellent wear resistance, dimensional stability, and oil resistance, and can be used for medium load and speed bearings. The creep resistance of ABS is larger than PSF AND PC, but smaller than PA and POM. The bending

strength and compression strength of ABS are the worse of plastics. The mechanical properties of ABS are greatly affected by temperature.
