BASF Ultradur B 4040 G3 HT BK5830 15% Glass Filled PBT/PET

Polymer, Thermoplastic, Polyester, TP, Polybutylene Terephthalate (PBT), PBT + PET Blend, Glass Filled, Polyethylene Terephthalate (PET) BASF产品说明:

Ultradur B 4040 G3 HT BK5830 is a 15% glass filled, pigmented black, injection molding PBT. It is a resin for molding household appliances and equipment which must be resistant to chemicals and other media, and be capable of producing an excellent surface finish. In addition, some types of kitchen equipment have to withstand high temperatures. B4040G3 HT's resistance to high sustained-service temperatures makes it a material of choice when things get hot. Internal testing demonstrates that the product meets the UL94 HB (0.8 mm thickness) flame requirements.
