巴斯夫 Irganox 1010 塑料添加剂

Irganox1010

Phenolic primary antioxidant for processing and long-term thermal stabilization

Characterization Irganox1010 – sterically hindered phenolic antioxidant – is a highly effective,

non-discoloring stabilizer for organic substrates such as plastics, synthetic fibers, elastomers, adhesives, waxes,

oils and fats. It protects these substrates against thermo-oxidative degradation.

Chemicalname Pentaerythritoltetrakis(3-(3,5-di-tert-butyl-4-hydroxyphenyl)propionate)

CASnumber 6683-19-8

Chemical formula

Molecularweight 1178g/mol

Applications Irganox 1010 can be applied in polyolefins, such as polyethylene, polypropylene, polybutene and olefin copolymers such as ethylene-vinylacetate copolymers. Also, its use is recommended for the processing of polymers such as polyacetals, polyamides and polyurethanes, polyesters, PVC, styrene homo- and copolymers, ABS, elastomers such as butyl rubber (IIR), SBS, SEBS, EPM and EPDM as well as other synthetic rubbers, adhesives, natural and synthetic tackifier resins, and other organic substrates.

Features/benefits Irganox 1010 has good compatibility, high resistance to extraction and low

volatility. It is odorless and tasteless. The product can be used in combination with other additives such as

costabilizers (e. g. thioethers, phosphites, phosphonites), light stabilizers and other functional stabilizers. The effectiveness of the blends of Irganox 1010 with Irgafos 168 (Irganox B-blends) or with Irgafos 168 and Irgafos FS042 is particularly noteworthy.
