

# PP-中石化茂名溶喷布专用料-PPH-Y1500

产品名称	PP-中石化茂名溶喷布专用料-PPH-Y1500
公司名称	东莞市华韵塑胶原料有限公司
价格	33.00/kg
规格参数	品牌:95级专用熔喷原料 型号:95级+专用熔喷料 产地:溶喷口罩原料
公司地址	东莞市樟木头镇奥园塑金国际8栋214
联系电话	0769-87600377 13556776933

## 产品详情

PP-中石化茂名溶喷布专用料-PPH-Y1500

4. Improve the properties of PP / Pe recycled materials P or PE recycled materials due to the degradation or cross-linking after reprocessing, PP / Pe recycled materials or comminuted leftover materials will become very brittle, can not be added in large quantities or directly used, added Poe blending granulated, or directly injected, can make PP / Pe recycling performance greatly improved, such as plastic tray, plastic turnover box, plastic toolbox, plastic office chair accessories, Beach Chair and so on. Extrusion pipe industry,

in the hose industry, especially the extrusion of winding corrugated pipe, Eva and Poe mixed use of products more flexible, better flexure and winding resistance, products lighter, better resistance to environmental stress. Added to the inner layer of the extruded flat pipe, the hose has anti-pollution sealing, the required heat sealing temperature is low and the heat sealing strength is higher! Widely used in vacuum cleaner hose, washing machine hose, drainage pipe. 6. The extremely low crystallinity of the color masterbatch or filled masterbatch makes the POE have good inclusion and excellent fluidity for filling, which makes the POE be used as carrier or substitute for pe wax in the color masterbatch or filled masterbatch, the quality of Color masterbatch or filling masterbatch is greatly improved.

五、挤出管行业 在软管行业，尤其是挤出缠绕波纹管，EVA和POE的混合使用得到的产品更柔韧，耐屈绕性更佳，产品更轻，抗环境应力更佳。添加在挤出平管的内层，使得软管具有抗污染性的封口，所需的热封温度低且热封强度更高！广泛的应用于吸尘器软管，洗衣机软管，排水管。

六、色母或填充母粒 POE的极低的结晶度使得其对填充有着良好的包容性的流动性，使得POE在色母粒或填充母粒中当作载体或者代替 P E 蜡，使得色母或填充母粒的品质大为改善。

七、热熔胶 POE可以代替EVA生产热熔胶，较EVA热稳定性更佳。且产品可以做到无异味，低密度，高的流动涂覆性，浸润性好等。例如用于包装及无纺布领域的热熔胶。也可以与EVA并用！
