产品详情

The "new retail" model breaks the previous closed state of online and offline. Online and offline can integrate with each other, learn from each other and rely on each other. Online performs more functions of transaction and payment. Offline is usually used as a platform for screening and experience, and efficient logistics connects online and offline and interacts with them to form a business closed loop.

“新零售”模式打破了线上和线下之前的各自封闭状态，线上线下得以相互融合、取长补短且相互依赖，线上更多履行交易与支付的职能，线下通常作为筛选与体验的平台，高效物流则将线上线下相连接并与其共同作用形成商业闭环。

Based on this model, consumers can not only get a good shopping experience of traditional offline retail, but also enjoy the low price and convenience of traditional online e-commerce. The continuous penetration of various emerging technologies into the whole process of people's shopping will integrate more intelligent factors into the goods and services provided by enterprises.
