

# 联兴氟橡胶辊介绍及应用

产品名称	联兴氟橡胶辊介绍及应用
公司名称	衡水市冀州区联兴制辊有限公司
价格	100.00/支
规格参数	品牌:联兴 长度: 6000mm 产地:河北
公司地址	河北衡水市冀州市和平东路
联系电话	86-0318-8780313 13582683797

## 产品详情

河北联兴氟橡胶辊是由全氟醚橡胶加工制作而成，是目前所有胶辊中耐高温范围\*高，耐腐蚀\*好的产品，所以主要应用在强腐蚀性和高温运转要求的工作环境下使用。耐化学溶剂腐蚀性种类几乎包含现在已知的大多数溶剂，既能耐强酸强碱工作环境，同时能在两种以上溶剂环境下正常工作，对燃料油、溶剂、液压油等有机溶剂，对浓硝酸、浓硫酸、浓盐酸和高浓度过氧化氢和其他强氧化剂作用的稳定性方面，均优于其他各种胶辊。耐热性能优越，能在高温290 的工作环境下长期运转，短暂接触运行温度可高达340 左右。

Hebei Lianxing fluororubber roller is made of perfluoroether rubber. It is the product with the highest high temperature resistance and the best corrosion resistance among all rubber rollers. Therefore, it is mainly used in the working environment with strong corrosion resistance and high temperature operation requirements. The types of chemical solvent corrosion resistance almost include most of the known solvents, which can work normally in the environment of strong acid and alkali, and can work normally under more than two solvent environments. The stability of organic solvents such as fuel oil, solvent, hydraulic oil, concentrated nitric acid, concentrated sulfuric acid, concentrated hydrochloric acid, high concentration hydrogen peroxide and other strong oxidants are better than other adhesives Roll. It has excellent heat resistance and can operate for a long time under the working environment of up to 290 . The short-term contact operation temperature can be as high as 340 .
