

喷油泵试验台 喷油泵试验台

产品名称	喷油泵试验台 喷油泵试验台
公司名称	南阳市南泰试验设备有限责任公司
价格	.00/个
规格参数	类型:喷油泵试验台 电源电压:380 (V) 功率:11 (W)
公司地址	南阳市高新技术产业开发区
联系电话	62080658 15837731319

产品详情

类型	喷油泵试验台	电源电压	380 (V)
功率	11 (W)	工作温度	38 ()
尺寸	2.34 (cm)	品牌	南阳南泰
型号	500-07		

其采用先进的变频技术和成熟的数字化技术，具有转速、温度、计数自动控制、手动、自动两套操作系统。并配备有位移传感及检测多种中外多种高压油泵所需的相关配套附件。

主要功能：1.喷油泵各缸供油量和供油均匀性的检测调试。2.静态检测各缸供油间隔角和供油始点。3.检查和调整机械调速器性能4.喷油泵密封性检查5.分配泵电磁阀的试验6.分配泵回油量的测量7.检测分配泵内腔压力8.检查气膜式机械调速器性能9.检查增压补偿器性能10.测量齿杆行程11.输油泵的检查

it adopts advanced frequency conversion technology and the automatic control system of industrial computer test , count numeral control , lcd double control and dual display system , and is equipped with the relevant attachments for measuring the domestic and international various kinds of high pressure oil pumps.

function :

1 , the testing debugging about oil-supply amount of each cylinder and oil-supply uniformity of injection pump.

2,check the oil-supply spacing of each cylinder and oil supply starting point in the static state.

3 , check and adjust the performance of mechanical speeder.

4 , the sealing inspection of injection pump.

5 , the test of value of distribution pump.

6 , the test of loop oil of distribution pump.

7 , check the intracavity pressure of distribution pump.

8 , check the performance of air-film mechanical speeder.

9 , check the pump of pressurized compensatory .

10, measurement of rack travel.

11,the inspection of oil delivery pump.
