

轧辊生产厂家 轧辊 圣霖国际【诚实守信】

产品名称	轧辊生产厂家 轧辊 圣霖国际【诚实守信】
公司名称	鞍山市圣霖进出口贸易有限公司
价格	面议
规格参数	
公司地址	辽宁省鞍山市高新区越岭路256号（研发中心A座2号楼510室至511室）
联系电话	13904127277

产品详情

轧辊按材质主要分为哪几种类别？

轧辊按制造材料主要划分为铸钢系列轧辊、铸铁系列轧辊和锻造系列轧辊三大类别。

What are the main categories of the roll according to the material?

Rolls are mainly divided into three categories: cast steel series rolls , cast iron series rollers and forging series rolls.

修正精度高，涂层厚度从几微米到几毫米，可对金属工件呈现磨损、划伤、裂纹、破损变形、硬度降低、损害等缺点进行堆积、封孔、补对等修正功用，只须打磨、抛光，也可进行车、铣、刨、磨等各类机械加工，以及电镀等后期加工。

The thickness of the coating is high , and the thickness of the coating is from several micr to a few millimeters. It can be worn , scratched , pinholes , cracks , 轧辊 , breakage and deformation , hardness reduction , damage and other shortcomings to accumulate , seal , and compensate for the defects , such as grinding , polishing , milling , milling , grinding and other kinds of mechanical processing , 轧辊设备哪家好 , as well as electroplating later processing.

(1) 堆焊前需先将轧辊辊身表面的疲劳层或缺陷，尤其是裂纹必须彻底清除；

(2) 在堆焊时，轧辊厂家，为了防止裂纹的产生，必须先加工轧辊辊身预热，预热温度根据轧辊辊及堆焊材料而定。

(1) before welding , the fatigue layer or defect of the roller body surface must be first removed , especially the crack must be thoroughly removed.

(2) in the process of surfacing , in order to prevent cracks , the roller body must be pre heated , and the preheating temperature should be determined according to roll rolls and surfacing materials.
