

## forging生产厂家 forging 圣霖国际【客户至上】

产品名称	forging生产厂家 forging 圣霖国际【客户至上】
公司名称	鞍山市圣霖进出口贸易有限公司
价格	面议
规格参数	
公司地址	辽宁省鞍山市高新区越岭路256号（研发中心A座2号楼510室至511室）
联系电话	13904127277

### 产品详情

选择好的锻件产品跟锻造工艺或者锻造厂家肯定是有关系的，现在有越来越多的锻件厂走向市场，对此，用户挑选锻件产品的难度就增加了。如果对锻件缺乏专业的认识，那么，forging采购，在选择的时候就会多很多顾虑。

The selection of good forging products is closely related to forging process or forging factories. Now more and more forgings factories are going to the market. Therefore, users' difficulty in selecting forgings is increasing. If the forgings are lack of professional knowledge, there will be a lot of scruples when choosing.

锻造设备主要用于金属成形，所以又称为金属成形机床。锻造设备是通过金属施加压力使之成形的，力大是其基本特点，故多为重型设备，设备上多设有安全防护装置，以保障设备和人身安全。

Forging equipment is mainly used for metal forming, forging生产厂家, so it is also called metal forming machine tool. Forging equipment is formed by exerting pressure on metal, and its basic characteristics are large force. Therefore, most of the equipment are heavy equipment, and many safety protection devices are set up on the equipment to ensure the safety of the equipment and the body.

在考虑锻造工艺时特别是最后一火的锻造时，应尽量避免在临界变形程度下进行，以免得到粗大晶粒组织。具体来说，高温下金属塑性好，变形抗力小，forging价格，应采用远大于临界变形程度的较大变形量锻造；低温修正时采用低于临界变形程度的小变形量进行局部修整。

When the forging process is cided, especially when the last fire is forged, the critical deformation should be

avoided as far as , so as to avoid coarse grain structure. Concretely speaking , high temperature metal has good plasticity and small deformation resistance. We should adopt large deformation amount forging far greater than critical deformation degree. When low temperature correction is used , small deformation below critical deformation degree should be used for local trimming.

forging生产厂家-forging-圣霖国际【客户至上】由鞍山市圣霖进出口贸易有限公司提供。鞍山市圣霖进出口贸易有限公司 (shenglininternational.cn) 是从事“型材设备,轧钢设备,轨道设备”的企业,公司秉承“诚信经营,用心服务”的理念,为您提供高质量的产品和服务。欢迎来电咨询!联系人:王秋。
