产品详情

DOW 510 DOWSIL Silicone Fluid

Get protection against water, gases, salts, dilute alkalis and acids by using Dow Corning 510 Fluid from SkyGeek. The clear, heat-stable silicone fluid is designed to be pourable at even very low temperatures making it easy to apply in a hangar or out in the field. The fluid is highly resistant to permanent shear breakdown and boasts excellent dielectric properties. It is easy to apply and delivers superior protection and long-lasting durability. The versatile fluid can be used in electrical applications and other types of installations throughout the aircraft. Dow Corning 510 Clear Silicone Fluid is sold in a variety of container sizes to suit your needs. The fluid dries to a white color for easy identification. Same day shipping is available for this product for an additional charge. A manufacturer's certification may be purchased with any order by request. The clear silicone fluid is priced competitively, but volume pricing i
