产品详情

它的半透明颜色使BONDERITE S-AD 1614 ACHESON成为使用其他深色固体润滑剂令人反感的应用的理想选择。

BONDERITE S-AD 1614 ACHESON显着降低了摩擦，改善了润滑油的极压，承载和抗磨损性能。

这导致节能，更平稳的操作，延长的寿命以及降低被润滑物体的维护成本。

PTFE可防止表面接触和磨损，同时在边界条件下提供可靠的润滑。

Its translucent color makes BONDERITE S-AD 1614 ACHESON desirable for applications where use of other dark colored solid lubricants would be objectionable.

BONDERITE S-AD 1614 ACHESON demonstrates significant reduction of friction and improves the extreme pressure, load carrying, and anti-wear properties of lubricants.

This results in energy savings, smoother operation, extended life, and reduced maintenance costs of the object being lubricated.

The PTFE prevents surfaceto- surface contact and scuffing while providing reliable lubrication under boundary conditions.
